

Youth Champion Award

SavY Charitable Trust

The SavY management team of 15 volunteer university students has worked tirelessly and passionately to help build young New Zealanders financial literacy skills. In addition to their studies, the team has developed free financial literacy (money management) workshops, trained and managed 40+ student facilitators, and facilitated more than 250 workshops with young people.

“SavY equips young people with the ability to make informed decisions that pave the way to personal success and financial stability. Feedback has been highly complimentary including many students reporting raising discussions about money with their families.”
